

# Configura® Bariatric

## Training

We are committed to providing training and support to make you competent and confident in issuing Configura chairs.

**There are two ways we can help prescribers:**

**Product awareness days** - we visit your organisation to carry out detailed product training sessions covering the functions and issuing of the chair.

**Professional seminars** - day long seminars delivered by professional Occupational Therapists to raise awareness of seating issues such as pressure and posture management.

Configura® Bariatric brings Configura® technology to bariatric seating. This offers unprecedented adjustability, flexibility and peace of mind for the prescriber.

Supplied as standard with a 40 stone Dual Motor mechanism with a legrest capacity of 16 stone, Configura® Bariatric offers width adjustment from 24" to 28" within the same chair.

It is also available with a full width alternating air cushion to meet the needs of users at high risk of pressure damage.

- **EASY ADJUSTMENT** before and after delivery to suit varied and changing needs
- **QUICK** and easy to recycle via removable, washable covers
- **AFFORDABLE**, providing more consistent budget management and significant savings on special chairs

### Size options

All permutations of the sizes below can be achieved from one chair size.

Seat width	Seat depth	Seat height
28"	22"	18"
26"	20"	18"
24"	18"	18"

**1**

**Dual Motor**

Configura® Bariatric's Dual Motor operation allows independent adjustment of the legrest elevation and backrest recline. This enables infinite positioning for maximum comfort and support for users with more complex requirements. Configura® Bariatric also has a riser function to make transfers easier. It has a weight capacity of 40 stone with a 16 stone weight capacity on the legrest for the heaviest users.

**2**

**Width adjustment**

Selecting the correct width on a bariatric chair is a challenge. Do you assume the user's weight is stable or do you select a wider chair to be on the safe side? But if you select a wider chair, will the armrests be too far apart for transfers and postural support? Taking an accurate measurement on a bariatric client can also be difficult.

Configura® Bariatric makes selecting the chair width easy and trouble-free via removable armrests. This allows widths of 24", 26" and 28" to be achieved within the same chair giving you peace of mind and allows adjustment for changing needs after delivery.

**3**

Supportive armrests for easy transfers

**4**

16 stone weight capacity on legrest

**5**

Breathable, wipeable fabric on seat base and backrest

**6**

**Posture options**

**Multi-adjustable Pillow Backrest**

Each pillow is height adjustable and filling can be customised to the user. Offering mild to moderate postural support, the Multi-adjustable Pillow Backrest is highly effective for users with a kyphosis or a scoliosis. Excellent for postural accommodation. Supplied as standard with VP fabric for comfort and pressure reduction.

**2 x Lateral Supports**

Lateral Supports to fit underneath the backrest pillows to provide lateral support combined with the comfort and adjustability of the Multi-adjustable Pillow Backrest.

**Profiled Headrest**

Suitable for users with reduced head control. Fits over the shoulders.

**7**

**Aventia**  
Innovates in support surfaces

**Pressure cushion options**

A wide range of pressure cushions to suit different user needs:

Visco

ViscoGel

Cushionair cushion used with battery powered pump
