

healthcare collection

practical, creative and innovative furniture solutions

teal

solutions provider

Teal are a solutions based provider of high quality patient seating, ward furniture and specialist products for healthcare.

A UK manufacturer with substantial production, design and testing facilities, Teal is research-driven, working closely with healthcare professionals to meet a diverse range of patient needs and commissioning work from external designers of international repute.

The company operates a customer focused, total quality culture, with ISO9001:2008 and environmental management system ISO14001:2004 accreditation, in addition to a commitment to the Furniture Industry Sustainability Programme (FISP).

Teal is an established provider to the NHS in England, Wales and National Services Scotland with proven success in delivering large refurbishment and new build projects through a nationwide project management team. The complete solution for both NHS and private healthcare providers.

testing & standards

Maximum Loads

Teal chairs and derivatives have met the requirements of Standard BS EN 15373: 2007 Test Level 3 Strength and durability & safety requirements for non domestic seating, strength and durability performance Standard EN 1728: 2000. Clauses 6.2.1, 6.2.2 and 6.2.8 relate to static load tests applied and passed which support our recommendation of a maximum load of 25 stones for the patient seating models indicated.

Medicote Anti-bacterial Lacquer

Teal chairs incorporate clear Medicote lacquer, formulated to include an agent that stops bacteria surviving on the surface. 448 Medicote will prevent the spread of *Staphylococcus aureus* (MRSA), *Escherichia coli* 0157 (e.coli), *Salmonella enteritidis*, *Bacillus cereus* (food poisoning) and other bacteria with a kill

rate of 99% within 24 hours. (Accredited by Law laboratories ref 05H547).

Medicote also reduces the risk of deterioration, discolouration and odours caused by micro-organisms. Meets the requirements of FIRA Standard 6250: 2005 and rated as Heavy/Severe use.

Contract Fabrics and Vinyls

Teal offer a comprehensive range from carefully selected major contract fabric manufacturers.

High performance vinyls are available with anti-microbial and anti fungal protection. Tested to AATCC147. Vinyls in our collection are effective against a broad spectrum of bacteria and fungi including *Bacillus cereus*, *Bacillus mycoides*, *Enterococcus faecalis*, *Proteus vulgaris*, *Salmonella typhimurium*, *Staphylococcus aureus*, *Bacillus subtilis*,

Escherichia coli, *Klebsiella pneumoniae*, *Pseudomonas aeruginosa*, *Salmonella choleraesuis*.

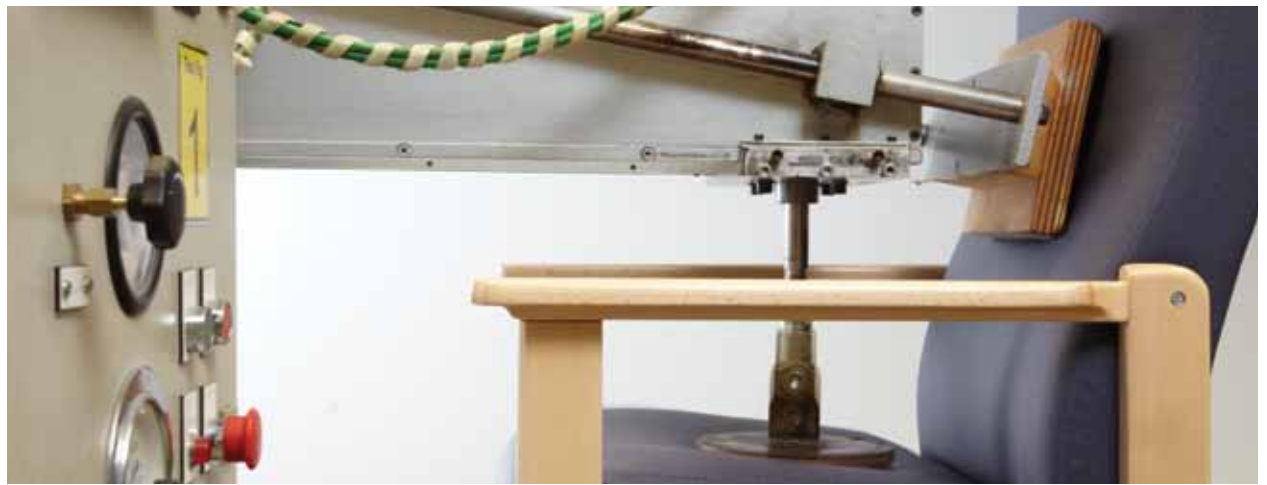

Vinyl can be cleaned with a 5% dilution of bleach to aid infection control. Fabric cards are available on request. Please call 01254 688210 to request sample swatches and specifications.

Flame Retardancy

Chairs meet Furniture & Furnishings (Fire) (Safety) Regulations 1988; in addition, the covers meet BS5852 Part 2 Ignition Source 5, thereby complying with the requirements of the National Health Service.

Strength and Stability

All models are designed and manufactured to BS4875 level 4 for general contract use.

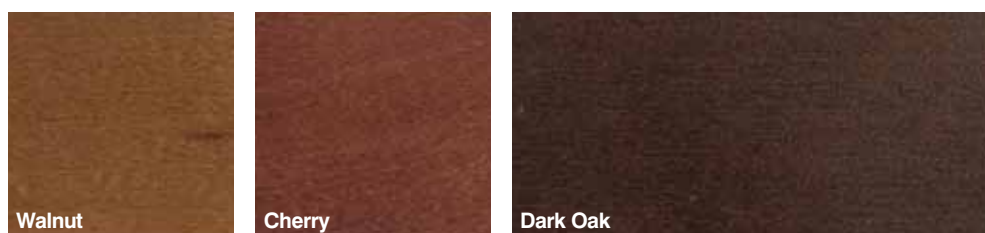

fabrics & finishes

Wood finishes: Optional finishes available on all solid timber chairs

Fabrics

Teal source contract fabrics from market leading manufacturers. Durable and resistant to abrasion, a range of fabrics are available to meet the specific demands of the healthcare environment. Many are stain resistant, waterproof and have anti-microbial, anti fungal properties to help reduce the risk of Healthcare Associated Infections.

Fabric Swatches

Please contact Customer Services for help in the selection of a suitable fabric for your environment. Fabric swatches are available on request.

The right fabrics are essential to the overall healthcare experience. Teal have a comprehensive interior collection from the market leading resources to meet specific demands of durability, aesthetics and infection control. Many are stain resistant, repellent, and waterproof and have technology built in to help in fighting infection causing bacteria.

The right combination of colours, patterns and textures are essential to complement the range of seating and finishes within the healthcare environment. Teal staff can help guide you through the options to best suit your requirements

Customers Own Fabrics

Teal can upholster in a customer's own material. Please contact Teal Customer Services prior to placing an order.

Cleaning and Maintenance

Always follow the care and maintenance procedures specified by the fabric manufacturer.

For General Guidance

Clean and care for the fabric on a regular basis to maintain condition and appearance. Most stains can be removed by wiping clean.

Wipe clean regularly with a damp cloth to remove dust particles and light soiling.

Remove spillages promptly (within 15 minutes) with an absorbent dry cloth.

E cloths are recommended for general cleaning of upholstery.

These are general guidance only. Always refer to the manufacturers instruction for details specific to the chosen fabric.

Please see our recommended fabric choices as shown on page 95.

Testing and Standards

All fabrics and vinyls pass BS5852 Ignition source 5 or higher and BS7176 Medium hazard.

All foams are combustion modified high resilient fire retardant

Wood Finishes

Furniture is manufactured in solid Beech or Laminated Beech and are available in clear or a number of stained finishes.

Standard finishes available on all solid timber chairs.

Stains can be matched to customers own requirements. The original should be provided in this instance.

Wooden Frames - Infection Control

Teal patient chairs and most other polished chair frames incorporate clear Medicote lacquer, formulated to include an agent that stops bacteria surviving on the surface. 448 Medicote will prevent the spread of Staphylococcus aureus (MRSA), Escherichia coli 0157 (e.coli), Salmonella enteritidis, Bacillus cereus (food poisoning) and other bacteria with a kill rate of 99% within 24 hours. (Accredited by Law laboratories ref 05H547).

Medicote also reduces the risk of deterioration, discolouration and odours caused by micro-organisms. Meets the requirements of FIRA Standard 6250: 2005 and rated as Heavy/Severe use.

Colours shown are for guidance only and may not be identical to a finished manufactured item.

patient seating

The first truly innovative, ergonomically designed Salus chair with Medipur™ anti-bacterial surfaces is the latest addition to the Teal patient seating range.

Teal offer a complete range of patient and visitor seating, from specialist high dependency chairs, upholstered drop arm models for nursing mothers and bariatric seating to accommodate patients up to 320kg (50 stone). All designed with easy care in mind and with optional accessories to suit. Bespoke solutions also available.

Heavy duty wood frames incorporate mortise and tenon joint construction, finished with Medicote anti-bacterial lacquer and guaranteed against wear and tear for 10 years.

salus

The first truly innovative, ergonomically designed patient chair, providing continuous postural support with Medipur™ anti-microbial surfaces.

Salus comprises an integral skin Medipur™ PU with soft, pressure sensitive seat and an outer impermeable surface with anti-microbial finish. Simple, clean lines, with only five parts, all carefully designed to aid infection control whilst providing excellent ergonomic comfort.

Available in a choice of 4 standard colour options.

*Patent pending

Options

- Height adjustment glides and/or wheels
- Headrest
- Additional high risk pressure relief cushion

Key Features

- Integral skin Medipur™ with soft, compressible centre and an outer impermeable surface
- Durable, easy clean, non-porous, scratch resistant
- Soft, tactile feel with textured surface
- Housekeeping wheels as standard

- Assists Infection control: comprises only five parts - no fabric joins or stitching, chair frame encased in Medipur™ – eliminates surfaces around the sides and under the chair that normally trap dust and dirt. Smooth underside – no frame or webbing
- Dual pressure relieving capability - contoured seat/back replicates the shape of the body, the Medipur™ compressing to offer continuous postural support. Pressure sensitive seat with sprung internal frame relieves pressure on the sacral area
- Sacral gap for cleaning/lifting access

- 160 kg (25 stone) maximum load
- Tested to BS EN15373:2007 for strength, durability and safety

Finishes

- 4 colour options: Blue, Navy, Mint, Mulberry
- Flame retardant to BS5852 Crib 5
- Medipur™ with anti-bacterial finish. Medipur™ contains an additive which provides continuous anti-bacterial and anti-fungal protection against over 50 common organisms such as MRSA, e.coli, Salmonella, Listeria, Pseudomonas, and Aspergillus Niger.

salus

The first truly ergonomic, anti-microbial patient chair, designed around the user with continuous postural support.

purdy

Multi purpose healthcare chair.

Purdy is a stacking, multi purpose healthcare chair designed to complement the Salus patient chair range. With an integral skin moulded polyurethane body, Purdy has apertures in the hidden framework that allow the PU to 'give' and 'flex' in the seat and back areas for excellent levels of comfort.

Key Features

- Crisp, cohesive and highly durable seating with few parts and hidden fixings
- Easy clean Medipur™ anti-bacterial PU surfaces
- Stackable

Finishes

- Medipur™ anti-bacterial finish
- Legs in matt regal silver as standard
- Red or green colour options

range features

Teal specialist seating includes a fully upholstered range of patient seating, recliners and bariatric seating – all available in co-ordinating fabrics, all manufactured with infection control, manual handling, tissue viability and easy care in mind.

Manual Handling

Teal offer a range of options – for ease of manoeuvrability and without the need for manual handling.

Tissue Viability

Standard foam is ideal for the majority of applications. For the frail elderly, mobility impaired or those with wounds or

bed sores a range of pressure relieving foams are available, as shown right.

On the facing page you will see a variety of pressure reduction cushions to ensure the correct level of comfort and pressure reduction.

Infection Control

Teal patient seating features a combination of an anti-bacterial frame, coupled with a range of high performance vinyl options which are 5% bleach cleanable.

Wooden Frames

- Coated with Medicote, a lacquer containing an agent which prevents bacteria surviving on the surface
- Medicote will prevent the spread of MRSA, e-coli, Salmoneli enteritidis, Bacillus cereus and other bacteria
- Medicote reduces the risk of deterioration, discolouration and odours caused by micro-organisms
- Meets the requirements of FIRA Standard 6250:2005 and rated as heavy/severe use

High back

provides good head support for a variety of clients

Ergonomically designed back

provides excellent lumbar support for clients with back care issues

Integral grip arm

assists frail elderly to a standing position. Smooth, rounded corners with no sharp edges

Plugged screw fixings

helps avoid infection issues

Smooth, lacquered hardwood frame

to prevent dirt ingress.

Frames guaranteed for 10 years*

subject to normal wear and tear, excluding upholstery

High performance vinyls lead the way in infection control

- anti-microbial and anti-fungal protection
- waterproof, stain resistant, flame retardant
- high scratch resistance – colour solid to the base cloth

Wipe-down rigid moulded base

for easy cleaning and hygiene control

Strong, durable, solid Beech frames

manufactured with mortice and tenon joints, glued and pinned

Sacral gap option

allows for easy cleaning in line with infection control requirements

Maximum load

160kg (25 stone)
[Maximum load & seat height indicator disk]

Seat height

choose a seat height to suit the environment. Standard is 480mm (19"); 405mm (16") for paediatrics

*Applies to frames on all Teal Patient Seating

accessories

A range of accessories to suit client and carer requirements.

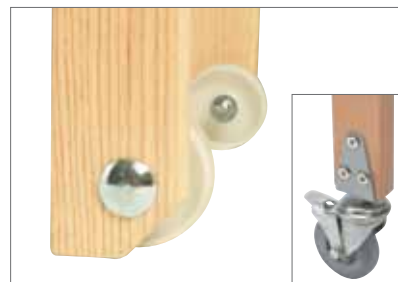

Seat Height Adjusters (HA)

- For a leg adjustment of up to 100mm – these will be added to the lowest seat height offered unless otherwise specified.

Seat Height Adjusters with Housekeeping Wheels (HARW)

- Height adjustment with the benefit of improved mobility.

Housekeeping Wheels /Braked Castors

- Can be fitted to most patient seating. They improve chair mobility and remove the need for lifting.

Tray Option

- An optional fitted tray is available subject to adapted arm being supplied at time of chair manufacture and is included in price of tray. To adapt a chair without a tray will cost extra.
- Can be fitted to Aylesbury (830), Fleming (F50), K Range (K10), Apollo, Perry (730), High Dependency Nightingale (N1/N2) models.

Removable Seat

- A removable seat is available upholstered on to the rigid plastic platform to give two seat depth adjustments.
- Wipe-down rigid moulded base for easy cleaning and hygiene control.

Removable Seat Platform

- Wipe-down rigid moulded base for easy cleaning and hygiene control.
- Two seat depths possible 445mm and 480mm.
- Allows for the interchangeability of seat cushions for specific pressure-reducing needs. Can be used in conjunction with dynamic systems.
- Removable seat bases are only available on Perry (730), and variants, and Apollo ranges.

Infection Control

Removable seats and seat platforms can be wiped clean in line with local infection control procedures.

Seat height adjusters: clients with varying posture, leg lengths and physical abilities mean that the standard 19" seat height may not be appropriate in all situations.

Height adjusters can provide a variable seat height, with adjustment in increments up to 100mm (4") maximum, allowing bespoke seat heights to be created along a preset range.

Depth adjustable seats allow for adjustment to suit the user.

Manual Handling

Housekeeping wheels (standard on Whittle Bariatric range) and braked castors aid positioning and avoid the need for manual handling.

Pressure Relieving Foams

To meet the needs of a variety of client groups, Teal patient seating is available in four seat grades, depending on the risk of tissue breakdown, following a clinical assessment. Please see page 14 for full details.

pressure reduction

Pro-texion™ pressure reducing seat foam helps to distribute body weight across a greater surface area.

Meeting the needs of Tissue Viability

Pro-texion™ pressure reducing seat foam helps to distribute body weight across a greater surface area, avoiding localised interface pressure by responding to body heat and forming to the body's shape.

To meet the needs of a variety of client groups, Teal patient seating is available in four seat grades, depending on the

risk of tissue breakdown, following a clinical assessment.

Teal offer high grade polyurethane foam as standard, with the option to upgrade to a low/medium risk comfort cushion, or for high risk environments to Pro-texion™ foam, which features 2 layers (the upper layer is Visco elastic foam, which is both temperature sensitive and energy absorbing, while

the lower layer provides support and flexibility for the upper layer).

The fourth option for very high risk areas is Pro-texion™ foam, but with the addition of a gel insert (and pommel as standard to help minimise shear) as standard.

PRO-TEXION⁺
CUSTOMISED PRESSURE RELIEF

PRO-TEXION⁺
CUSTOMISED PRESSURE RELIEF

Pro-texion™ is a special foam which reacts to body heat and moulds to the body's shape, thus distributing weight more evenly and reducing the risk of tissue damage through pressure and shear, Pro-texion™ helps improve circulation.

* Pressure mapping produced using an XSensor X3 system, with a healthy 80kg male subject. Cadet vinyl used on standard and AA grade cushions, Vyflex used on BB cushion. The mapping gives a good indication as to the effectiveness of the cushion, but its use must be combined with a programme of nursing care for the individual patient.

Standard High Grade CMHR Polyurethane Foam

AA Low/Medium Risk Comfort Cushion

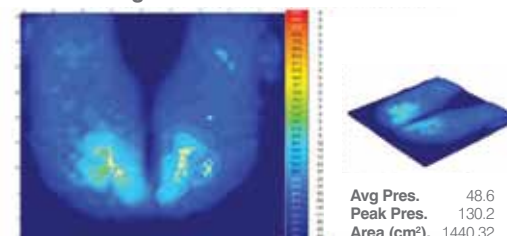

BB High Risk Pro-texion™ Visco Foam, with or without Pommel

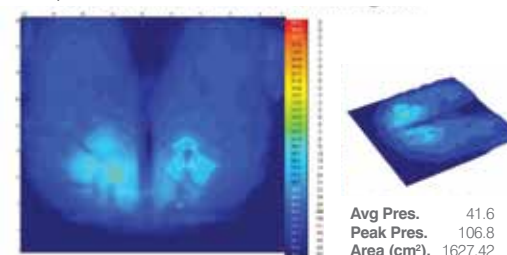

CC Very High Risk Gel Insert with Pro-texion™ Visco Foam

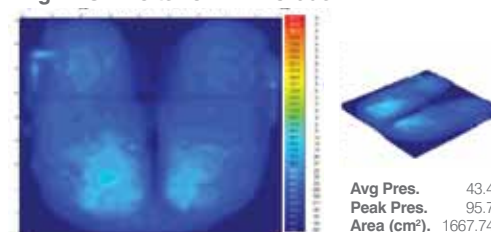

Standard High Grade CMHR Foam

Low/Medium Risk AA Grade

High Risk Pro-texion™ BB Grade

A heavy-duty contoured cushion with a gel insert suitable for use up to 190kg (30 stone). Incorporates a thick layer of visco elastic foam to enable stable immersion of the ischial tuberosities. Incorporates a pommel to minimise shear forces. Base material is made from the highest foam class – Class X: this will ensure longevity and durability in areas of constant use. Suitable for use with subjects clinically assessed at high risk of tissue breakdown.

X3 Hand-held data device

Pro-TexAir Single valve dry floatation air cushion

LX Sensor pad

pressure mapping

High risk air floatation cushion and XSensor X3 mapping services.

We are now able to offer integrated solutions for high risk and specialised patients. Teal, working with Sumed Ltd, are utilising the Pro-TexAir single valve dry floatation air cushion with 2.5" (6cm) or 4" (10cm high profile) interconnected air cells.

The Pro-TexAir system can be incorporated, as part of your seating order – at manufacture, on our Apollo range of patient chairs.

The Pro-TexAir system provides an adjustable, low deformation, counter-pressure environment that assist in the healing of ischemic ulcers. Appropriate for the high risk client.

Teal now offer a pressure

mapping service using our trained account managers and the XSensor X3 system.

The system consists of the LX sensor pad with 1296 individual sensing points. The data is then fed into the X3 hand-held data device, allowing clinicians and patients to view accurate, high-resolution representations of the pressure distribution.

Data is captured in realtime and can be stored and viewed at a later stage to compare changes in tissue management.

Please contact our Customer Services for more information.

**WILL GET RID
OF YOUR COLD.**

The best way to beat your cold, cough or sore throat is plenty of fluids and rest. For more advice call 1-800-888-8888 or visit us online at www.1-800-888-8888.

Germs. Out.

Hand sanitizer is the best way to keep germs out of your hands. It's fast, easy and effective. It's the best way to keep germs out of your hands. It's fast, easy and effective. It's the best way to keep germs out of your hands. It's fast, easy and effective.

new product

bolton pillow

Unique pillow design reduces risk of infection, increases patient comfort and saves costs.

Ian Bolton: Senior Cardiac Physiologist and Infection Link Practitioner, the designer of the Bolton Pillow

The Bolton Pillow Case is a unique adjustable pillow designed by a senior Cardiac Physiologist and Infection Link Practitioner within the NHS, eliminating the need for a single use pillow case.

Easily positioned, the Bolton Pillow hangs over the top of the couch backrest, while a counterbalance weight stops the pillow sliding down the backrest, allowing for adjustment to suit the patient while providing the correct level of head support and comfort.

Benefits 3 key aspects of nursing

• Infection Control

Easy to clean after individual patient use with anti-bacterial wipes in seconds – no soiled pillow case to launder. Helps reduce the risk of Healthcare Acquired Infections in line with current infection control procedures

• Tissue Viability

Provides correct support and comfort. Could also use a different pressure relief pillow if required

• Manual Handling

Easy and practical removal and placement when assisting and moving patients

Ideal for use in cardiac departments, ultrasound units, A&E, clinic rooms, care homes and a wide range of other outpatient healthcare settings

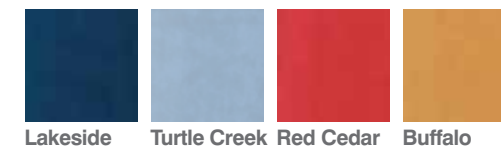

Finishes

Four standard colour options from the Enduralex Prairie range.

Fabrics tested to BS5790 part 1: type 2: Grade X: 1996, ISO 7617-1:1994E, Crib 5, UV stabilised, Mildew Resistant, MRSA, E-coli resistant.

BP101

Bolton Adjustable Pillow

nightingale

Flexibility is the key to the Nightingale high dependency day chair.

With the incorporation of Pro-texion™ foam the N1 (or narrower N2 model) features pressure relief as standard to help avoid local interface pressure. Nightingale can be customised to suit user requirements – height adjustable headrest with lateral support and integral neck rest, extendable footrest and with a range of optional accessories.

Accessories

Optional side panels and arm pads, clip on tray.

Key Features

- High risk Pro-texion™ foam fitted as standard for pressure relief
- Arms move with the tilt action – helping to maintain a comfortable posture and position
- Integral neck rest and lateral head support
- Height adjustable headrest – removable if required
- Smooth gas action recline – only operable by the carer

- Extendable footrest for added comfort and folds away to assist ambulant users to a standing position
- Braked castors all round for added safety during transfer
- N2 is 635mm wide and will pass through a standard door frame

Finishes

- High performance vinyl options – anti-microbial, waterproof, stain resistant, 5% bleach cleanable
- Solid Beech frame
- Frame finished in Medicote anti-bacterial lacquer

recliners

Astra, a new generation of riser recliners with enhanced user functionality – including tilt-in-space, complements the popular Woodcote and Bradwell. The recliners of choice for many NHS hospitals.

Teal offer a fully upholstered range of manual and electric recliners, including the new Astra, with dynamic tilt-in-space functionality and Trendelenburg/ bariatric model options. Equally well adapted to meet the needs of nursing mothers in maternity units, chemotherapy, renal or day surgery units.

Teal recliners feature deep upholstery for postural support with fully upholstered arms and an extending legrest for added comfort. For infection control, high performance vinyl options offer anti-microbial and anti fungal protection, as well as being waterproof, stain resistant and 5% bleach cleanable.

new product

astra

The Astra range with dynamic tilt-in-space, leg elevation and user lift functionality provides the ultimate in comfort, postural support and assisted standing.

Aesthetically designed with crisp, clean lines the Astra is equally at home in residential care or hospital environments, with optional features to suit individual requirements. Model options include 160kg (25 stone) manual and electric models and 220kg (35 stone) Trendelenburg/Bariatric models.

Options

- Handset key lock. Once removed the chair cannot be operated, as the key isolates the unit for safety
- Cable management – durable cable guard helps prevent trailing cable becoming damaged by castors
- Rechargeable battery pack option – provides usage for one day

under normal conditions. Recharge overnight

- Locking heavy duty castors
- Pro-texion™ pressure relieving foams
- Antimacassar head cushion
- Electrical safety cutout

Key Features

- 'Tilt-in-space' riser/recliner – the backrest and seat maintain the same angle in relation to each other as the user reclines, helping to maintain posture for those with reduced trunk and head support. Weight is spread evenly through the whole seat and back
- Clear, easy to operate handset with retainer
- 2 x independent motors

– allows the back and seat to move independently

- Emergency lower back up. Provided as standard via two 9 volt batteries. Allows return to safe 'normal' seated position in case of mains power failure
- Maximum load indicator sewn into upholstery, clearly visible for quick reference
- Recline angle: Standard models 162 degrees Trendelenburg model 180 degrees

Maximum Load

- Standard model 160kg (25 stone)
- Trendelenburg model 220kg (35 stone)
- Bariatric model 320kg (50 stone) (details on application)

Infection Control

- One piece arm border – minimises the number of seams over high-contact areas to aid infection control
- Fixed seat – no gap between the back and seat

Tissue Viability

ward furniture

Specialist seating isn't where our product range ends. Bedside lockers, over-bed tables and technology solutions are increasingly specified.

Self medication bedside lockers are an essential part of the equipment in any healthcare environment.

Available in a choice of colours, Teal lockers are now very competitively priced.

Teal offer a range of over-bed tables designed with infection control in mind. Anti-bacterial wipe clean surfaces with continuous moulded tops help to reduce potential bacteria contamination sites.

The introduction of ward technology with the specialist Humanscale range of healthcare ergonomic equipment.

new product

over-bed/chair tables

Designed with Infection Control in mind.

Designed to meet the requirements of Infection Control with continuous moulded table tops to reduce contamination sites. Features nano silver technology*. Fixed or tilting top options.

Accessories

Large braked castor option (maximum and minimum heights raised by 20mm).

Key Features

- ABS continuous moulded table tops to reduce bacteria contamination sites
- Gas action height adjustment – smooth adjustment from 675mm-980mm (26.5"-38.5")
- Single piece or tilting top options – tilting top can be adjusted to various angles

- 50mm twin castors to aid manoeuvrability

Finishes

- Designed with Infection Control in mind – Anti-bacterial and anti-microbial wipe clean surfaces, including base with anti-bacterial paint
- Durable, wipe clean Beech laminate top

* Independent tests have verified a high anti-bacterial activity of the product. Test germs were in contact at 35°C and the amount of S.aureus (MRSA) after 7 hours was 5000 times lower and the amount of E.coli after 6 hours was 3500 times lower than a reference sample which was not anti-bacterially equipped.

dining

Whether you need a compact, economical stacker or elegant dining chair or to furnish a restaurant we can help.

A comprehensive dining range available in a choice of standard finishes - including Shadow Beech, Beech, Dark Oak, Oak, Walnut and Cherry, to suit most interiors. Or choose something more contemporary such as the monoshell Ghost or multi-purpose Flare to complement Teal's range of dining and break-out tables.

Aspley, Avenue and Bergen are three new additions to the solid beech dining collection. Aspley has a beautifully styled lattice back, Avenue classical style, or choose the laddered back Bergen. All available with Medicote anti-bacterial lacquer and in a wide range of contract quality fabrics. Skid frame options.

campus

stackable, dining & activity tub chairs

Henley and Mayfair have been designed to withstand the rigorous use of dining areas whilst bringing an element of sophistication to the aesthetics.

Mayfair (do not stack)

Henley and Mayfair have beautifully contoured beech laminate frames, available with open or closed sides and generously upholstered for those seated for long periods.

They are great as dining or activity/visitor chairs, or even as a dressing table chair in the bedroom. Open sides mean that food does not get trapped down the side of the chair. Arms are easy to grip for rising. Can be finished in a range of contract quality fabrics - a faux leather for example is easy for wiping clean.

Key Features

- Henley chair stacks 4 high

Finishes

- Medicote anti-bacterial lacquer on all polished surfaces
- Frames available in Shadow Beech, Beech, Dark Oak, Oak, Walnut and Cherry

enzo

Stacking comfortably up to 40 on a trolley and 12 freestanding.

Stacking comfortably up to 40 on a trolley and 12 freestanding, this steel wire framed chair is available with or without arms and has been uniquely designed so that the arms do not compromise its stacking capabilities in any way.

The optional linking facility enhances this product's appeal and suitability for conference use and whilst the chair has a visually delicate framework its robustness and strength can withstand the most rigorous use. Enzo is available either with

an injection moulded plastic seat and back, fully upholstered or with an upholstered seat and plastic back. This variety encourages use across a plethora of environments such as training areas, corporate catering and as a visitor chair.

flare

Simple and elegant, multi-purpose stacking seating.

Simple and elegant multi-purpose stacking seating, Flare takes its name from the distinctively detailed top of the backrest.

The lip of the back, together with its straight

back edge, provides an interesting accent when the chairs are linked or arranged in rows, but more importantly the

feature provides superb comfort in the backrest.

Key Features

- Stacks between 4-6, dependent on model

tables

A range of occasional and dining tables – with softly radiused corners and wheelchair friendly height options.

Constructed from sustainable solid Beech bases and smooth laminate Beech finish tops. Sealed with a clear Medicote lacquer for a tough, crisp, contract quality finish.

Teal dining tables are available in a choice of leg styles – the tapered 'F style' or the more contemporary 'C style'. F style legs complement high back and easy chairs, as well as all dining chairs, while C style legs suit specific models.

An extensive range of occasional tables – Long John, circular or square are available at comfortable heights for communal lounge, reception or private rooms.

dining tables

Smart, simple dining tables with a choice of styles and leg shapes.

Key Features

- Soft, radiused corners for added safety
- Easy clean, scratch and heat resistant laminate top
- Wheelchair friendly heights
- Choice of leg styles – tapered 'F' style or contemporary 'C' style
- 714 model with traditional underframe
- Folding table option for multi-function areas

Finishes

- 25mm Beech laminate tops with bullnose edging, finished with a tough, clear Medicote lacquer
- Standard finish is natural Beech. Other options available
- Solid Beech legs on all models (except C600 ranges finished in Beech ply laminate)

'D' shaped ends can be added to all C and F style tables

elektra

Innovative and functional table system.

Elektra - innovative and functional table system whose frame folds within its own length for ease of re-configuration, storage and transportation. Being ideally suited to training and conference purposes the table can be easily dismantled and stored with the top being easily attached to the under frame by moulded plastic locating lugs. As no tools are required to assemble or disassemble the Elektra system it can be quickly and easily reconfigured

to suit any particular need.

The 1500 x 750 modular design allows all the classic table top shapes giving an almost endless choice of room layouts from boardroom to the extensively used horseshoe layout.

To further extend the system quadrant shaped corner units are added with a fixed under frame and are supported by adjacent tables.

The function, flexibility, ease of reconfiguration and storage of this

product make Elektra the number one choice of training and conference tables within the marketplace.

Key Features

- Black legs - standard
- Adjustable levellers
- Beach laminate

Options

- Silver RAL9006 legs
- Chrome plated legs

reception

Reception furniture with inviting levels of comfort, enhancing any reception or breakout area.

Flexibility is the key to Teal's collection of reception and breakout furniture.

Haywood features comfortable and durable seating in a range of versatile combinations. In the healthcare environment Haywood and Beam are designed with controlling HCAI's in mind. The simple longitudinal structure of the Beam seat allows for easy access and cleaning in line with infection control procedures. While Haywood is ideal for high traffic reception or outpatient areas, with the warm appeal of natural wood. Corner tables and seats can be linked to the Haywood to give an integrated look, or individual coffee tables can be added.

haywood

Modular reception seating easily configured to suit room layout.

Haywood combines comfortable, durable upholstery with the aesthetics and warmth of a natural wood finish. Facilitates formal, organised modular configurations – ideal for high traffic public waiting areas within NHS or educational environments. Free layout design service available.

Key Features

- Robust, durable, high quality laminated Beech frame
- Integral curved arm – assists frail elderly to a standing position

and provides a stand out area for those with visual impairment

- Sacral gap as standard between seat and backrest for access/cleaning
- Available without backrest stitching detail to aid infection control
- Arms may be specified between seats to preserve an individuals space
- Smooth rounded corners with no sharp edges
- Maximum load 160kg (25 stone)
- CAD layout design

service available for specifiers

Finishes

- Durable fabric or high performance vinyl options for healthcare – anti-microbial, waterproof, stain resistant, 5% bleach cleanable. Most light stains can be removed by wiping clean with a microfibre cleaning cloth
- Medicote anti-bacterial lacquer on all wooden frame surfaces
- Standard finish is natural Beech. Other options are available

with metal frame and wave tables

special services and products

Wining Specialist Work

At Teal we have an understanding of the overall design process and offer a valuable input into any scheme at any stage. We provide a full engagement process to the Architectural/Design community bringing a huge wealth of knowledge to the table.

We understand budget needs and can manage client expectations showing products and materials that are fit for purpose and value for money. Our aim is to become a proactive member of the decision making team on any given project or scheme.

Specialist Design

We have access to the latest and most sophisticated design software and 'smart blocks'. We develop bespoke products and have the ability to produce prototypes and samples for major projects and schemes. We will assist, when asked, in populating architectural layouts and create lifelike renders for appraisal.

We employ our own designers with the following disciplines being well resourced:

- **R&D and Product Design**
- **Interior Design**
- **Space Planning**

The Relationship

We believe in 'cradle to grave' relationships, in that, if we start a project with you we will stay with you from concept to sign off. We will maintain records of finishes, fabrics, timbers, dimensions and drawings which will assist 'day 2' business reducing the risk of errors.

Example

Combining innovative design with clever construction, our storage wall allows every last bit of valuable office space to be used to its full potential. This enables you to create a unique and flexible working environment whilst maximising all available floor space. Whether used as freestanding units to divide a room, or against existing walls, it offers a solution for every situation.

Example

Our range of reception counters will create an impressive, comfortable yet professional, client greeting point. Combinations of rectangular and radius base units, complemented with counter tops, shelves and other accessories create smart and professional reception units.

Available in a wide selection of modules with acrylic or perforated metal screens.
