3 years

# Introducing the new huggle<sup>®</sup>, from CareFlex

At CareFlex, we have listened to industry and user feedback to make our Huggle chairs even better. The Huggle still offers the same high standards of quality, relaxing comfort and effectiveness in posture and pressure management but, because every child is different, we've re-designed our chair to offer more choice and support than ever before.

Designed to complement the more prescriptive posture management of activity chairs used in the classroom, the new Huggle is a single frame design that can be adapted for the unique needs of each child – it comes as standard in the open Sprite configuration, but can be adapted to the cocooning style of the Snuggle with the addition of the Snuggle sides accessory pack. The Huggle's modern design is simple to set-up, easy to adjust and comes with an even wider range of accessories for the ultimate tailored fit.

- a Sprite** – provides a more open aspect for users with involuntary movements or who prefer greater visibility when seated
- b Snuggle** – the addition of the Snuggle sides accessory pack creates a more cocooning effect for the user, aiding feelings of security and comfort

# Now with more flexibility, comfort and support

- **Single frame design**

Our new Huggle comes in one frame, with 2 sizes (Toddler for up to 5 years\* and Junior for up to 9 years\*) and a host of enhanced accessories to provide the perfect set-up for the occupant. The new design offers more features and options as standard, but at the same great price.

- **Thoracic support**

We have introduced a new width adjustable thoracic lateral support system for the new Huggle. Effective management of the upper trunk posture is critical to help children develop and maintain control of their shoulder and head position – our easy-to-use system provides the ability to fine tune the user's position as they grow or their needs change.

- **Adaptable sides – Sprite and Snuggle configurations**

Based on the open design of the previous Sprite model, the new Huggle can be easily adapted to the popular Snuggle set-up through the simple addition of the Snuggle sides accessory pack – providing more choice and flexibility in a single model.

- **Adjustable footplate or padded leg rest as standard**

To provide additional postural support we have included an adjustable footplate with slotted leg rest as standard on every new Huggle. For occupants not requiring a footplate, a leg rest pad made from Reflexions foam can be supplied instead for added pressure relief.

\* Average sizes

**Available in a choice of 30 fabric colours**

# New huggle<sup>®</sup>, new and improved accessories

## Improved contoured headrest

Provides lateral control for the head whilst accommodating forwards head movement – now with improved attachment system for greater control of headrest positioning.

## New soft profiled headrest

Offers soft support and simple lateral control to help stabilise head position without generating pressure to the back of the head that may stimulate extensor patterns.

## Improved adjustable laterals

Our improved adjustable laterals answer the issues of support pad thickness and placement with simple, tool-free width and height adjustment.

## New Snuggle sides

The Snuggle sides quickly attach to the chair's backboard to create a secure, cocoon-like environment – they are fully upholstered with padded insides and edges.

## New contoured lumbar cushion

Great for children who need some lateral control to keep them centred in the chair – our sculpted pads give gentle support to centralise the trunk.

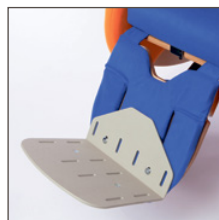

## Improved seat wedge

Now available in 50mm and 75mm thickness, the seat wedge helps keep the pelvis upright and prevents the child sliding forward in the chair.

## New Reflexions foam leg rest pad

The Huggle leg rest pad now has a Reflexions foam core, providing additional protection for the heels and feet.

## New footplate with slotted leg rest pad

Allows height adjustment of the footplate for tailored postural support, whilst protecting the heels and feet.

# The choice is yours

Along with meeting the needs of a wider audience than ever before, the new Huggle is available in a choice of 30 fabric colours. So not only can children and their families select the right configuration and fit for their individual needs, they can also customise the look of their chair to make it their own.

## Our fabrics

All our fabrics are flame retardant, waterproof, anti-bacterial and anti-fungal making them safe and easy to look after. Choose from our range of 'Just Colour', 'Stirata' or 'Panvelle Stretch' fabrics for a practical and cosy feel.

## Available in 30 colours:

## Choose your huggle®

All Huggle chairs are tailored to fit the individual user and are made to order with a choice of sizes, configurations, accessories and colours. Simply select your set-up with the help of our team and we'll handcraft your Huggle, with warranty protection too.
