WALKING AIDS

PAEDIATRIC CRUTCHES

We have a large range of paediatric crutches available in various different sizes and weights, please get in touch for further details.

PAEDIATRIC TRIPOD

We have a large range of tripods and quads available in various colours, sizes and weights, please contact a product specialist for more information

PAEDIATRIC WALKING FRAME

A vast range of paediatric walking frames available, in different configurations. Please contact a product specialist for more information.

ROMA WALKER

The Roma Medical Rollator is available in two sizes children's and adult. It has adjustable handles and rear non-slip rubber feet.

NIMBO POSTERIOR WALKER

The Nimbo is a posterior walker with numerous accessories available. Outdoor wheels, pelvic stabiliser, soft seat harness and dampeners. It can be used indoors or outdoors available in 5 different sizes. Excellent value for money and comes with a 24 month warranty.

TREKKER GAIT TRAINER

The Trekker gait trainer can be used as a posterior or anterior walker, it can be used indoors or outdoors. Automatically the Trekker has lockable/multi directional wheels, non reverse wheels, dampeners and height adjustable.

It has a wide range of accessories Trunk support, pelvic positioning pad, hand loops, gutters, ankle prompts, thigh prompts and guide bar which makes the Trekker very prescriptive and excellent value for money. Life time warranty on the frame.

WALKING AIDS

AKCES MED ACTIVALL

The Activall is available in 5 sizes, with a vast range of accessories to include pelvic support, thoracic support, Forearm support, lower limb stabilizers and lower limb separator. This walker can be used indoors or outdoors, different wheels available.

MULHOLLAND WALKABOUT

The Mulholland walkabout is a hands free gait trainer, 4 models available from baby (1years old) to teenager. The Mulholland walkabout is very prescriptive with optional length & width adjustment to allow for growth, optional thoracic & Pelvic support (swing away support rather than a sling), Sit bar or Tapered abduction seat to prevent scissoring, Neck rest options, shoulder pads, arm support and try table. Please get in touch for more details. (Due Summer 2018)

ATO FORM MOWEGO

5 sizes available which are height adjustable. The larger version also have a sit to stand facility, each model comes with a sandal seat as standard. Large variety accessories to include footrest, leg guides, anti-tippers, variety of weighted springs, Leg separation plate, Directional wheels, None reverse brakes, various thorax rings, special seats (long & narrow) and Drag brakes

TOPRO TAURUS WALKER

This walker is ideal for the home or care environment. It is a solid, sturdy walker which has been well designed and is very safe to use. Choose from a range of accessories including adjustable handles, driving and parking brakes or the optional swing lock.

STANDING AIDS

CAT 1 PRONE STANDER

The Cat 1 stander is available in 1 size, it adjusts from 25 to 85 degrees, the Cat 1 standers comes with most accessories required as standard with a few optional accessories.

SMART VERTICAL STANDER

The smart vertical stander is available in 8 sizes, the Smart stander is lightweight and has a small footprint so works very well for areas with limited space.

CAT 2 TRI STANDER

The Cat 2 stander is available in two sizes, can be used in vertical, prone or supine. The vast majority of accessories come as standard however there are a few optional accessories.

STANDING AIDS

THERA VERTO

The Thera Verto is a robust vertical stander that can take up to a user weight of 140kg. The Verto is a vertical stander and offers excellent support for the client - the Verto can also be upgraded to have an electric lifting belt to help get the client into the stander.

THERA BALO

The Thera Balo is very similar to the Thera Verto and has the same support system. However the Thera Balo also has the facility to not only be a vertical stander but to also work as a balance trainer/stander.

JCM AURORA

The JCM Aurora is a 3 in 1 standing frame, which can accommodate a full range from supine, through to upright and prone. Offering a full selection of options and accessories to support functionality and contemporary therapy, plus individual standing needs. All of this can be achieved with one tool for adjustment, supporting a user-friendly approach to postural management.

STANDING AIDS

DALMATIAN MULTIFUNCTIONAL DEVICE

The Dalmatian is a multifunctional piece of equipment that can be used as a chair but also converts into a standing frame. As a standing frame the Dalmatian offers vertical or supine standing. This is a great device to save the need for manual handling and reduce the amount of time of the transfer.

PHYSIOTHERAPY AIDS

PARALLEL BARS

Height adjustable paediatric parallel bars
(adult versions also available)

ADJUSTABLE BENCHES

Height adjustable benches available in three different sizes or alternatively we also supply the posture system which has added support

PAEDIATRIC STEPS

Paediatric steps with hand rails
(adult version also available)

CRAB AND CRAB PRO ADJUSTABLE STOOLS

The crab stool is a comfortable durable stool equipped with solid rubber castors for easy transportation. The Crab PRO has a contoured shape and adjustable height. Its durable construction and sturdy wheels will certainly make it easier for you to work with the patient.

HYDROTHERAPY AIDS

SPINAL BOARDS

We offer a range of spinal boards for Hydro pools, with a wide range of accessories

NECK SUPPORT

We offer various neck supports for Hydro to keep the child or adults head out of the water.

HYDROBELTS

The Comfy Hydro-belt is a great moving and handling belt for Hydro, various alternatives available.

TOMCAT CUSTOM MADE TRIKES

Tomcat trikes are a little different than other trikes on the market. Tomcat trikes are custom made to suit the child, trikes available from the age of 2 years old & upwards to adult sizes.

With Tomcat trikes we choose everything, the handle bars, the saddle, the amount of support, whether we would like carer control (so the carer can control the trike & brake the trike), the colour. Also the Tomcat trikes split in half to make transporting them very easy and can even be converted into a trailer trike. (Attach onto mum and dad's bike)

WHY TOMCAT?

- Peace of mind
- Completely bespoke to your child's exact needs and measurements
- Built to last
- Exceptional value and customer service
- Quality and innovation

TRIKES

TOMCAT BULLET SEMI RECUMBENT TRIKE

The bullet is a new member of the Tomcat family of trikes, the advantage with the bullet trike is for clients who need a semi recumbent trike rather than a conventional trike this solves the problem. But still offers the same custom built facilities that make Tomcat the bestselling trikes in the UK & Ireland.

TOMCAT TRAILER CHAIR

Tomcat designed a trailer accessory that quickly converts a trike to a trailer, for towing behind a carers bike. It is easily transportable and quick to build – converts from a trike to a trailer in seconds.

TOMCAT TAMARA TRIKE

The Tomcat Tamara trike is a custom made Tomcat trike but also has the extra facility of being a hoist accessible trike. The trike has a swivel seat and backrest that can move out of the way to allow a safe hoist transfer into the trike.

TOMCAT HAND BIKE

The Tomcat hand bike has the same facilities as the Tomcat custom made trikes, but instead of using your feet to propel the trike you use your hands. The frame can still be split in half, you can still have carer control and the frame is height and angle adjustable.

EQUIPMENT FOR RESTRICTED GROWTH

WOODEN TOILET FRAME

The wooden toilet frame is available in three different step heights 120mm, 140mm or 160mm. Offering greater support to the child or adult who is able to hold on to the hand rails while transferring on and off the toilet.

SVAN BALANCE

The Svan balance is available in 10 different configurations in total – the Svan Balance bolts to the toilet seat so is very secure. There are numerous arm options & footrest options available and the arms, footrest and overall frame is height adjustable.

FAMILY TOILET SEAT

A durable white toilet seat made from tough polypropylene plastic. It combines a standard adult toilet seat with a fold down child size toilet seat to reduce the toilet seat size and provide secure seating for the child. Designed to help to train children to use the toilet and is very easy to use. Fits easily onto most standard toilets, replacing the existing seat. Hygienic and easy to clean.

EQUIPMENT FOR RESTRICTED GROWTH

MERCADO CHAIR RANGE

The Mercado range of chairs are similar to office chairs in design but offer a lot more in terms of functionality. The Mercado chairs have fantastic height range – which allows users to potentially reach areas that they wouldn't normally be able to reach. This can be a manual chair or electric – the chair also has a brake so can be used safely.

TOMCAT SCIENCE CHAIR

The Tomcat science chair is particularly clever – generally used in the classroom environment but can also be used at home. The science chair is designed to increase independence, it has a transfer step and a footplate, the child transfers onto the chair using the transfer step and then pulls a lever which allows the child to rotate the seat into the desk and have their feet firmly on the footplate.

SEATING & POSITIONING

BREEZI HIGH CHAIR

The Breezi high chair is available in three sizes, starting from tiny tots to teenagers. The chair is very easy to adjust and there are a wide variety of accessories available to give additional posture and support.

AKCES MED KIDOO

The Kidoo chair is a very good value wooden chair, available in 5 sizes, the chair has back angle recline as standard, numerous accessories available. Laterals, headrest, Tray, Mobile Base, Ski's and footplates.

HEATHFIELD

The Heathfield chair is one of the most popular chairs on the market, it is designed for good postural sitting with minimum support. Available in 5 sizes to accommodate children from 18 months to adult. A range of accessories are also available.

JORDI CHAIR

The Jordi chair is a metal framed chair which is aimed generally for children in mainstream schools that require some additional support. Numerous accessories available.

DALMATIAN MULTIFUNCTIONAL CHAIR

The Dalmatian chair is a multifunctional device – that can be used as postural seating system but this clever chair can also turn into a supine or upright stander. Without the need to transfer out of the chair.

FLOOR SITTERS

TUMBLE FORMS FEEDER SEAT

The Tumble Forms feeder seat ensures children are comfortable and secure during meal times, easy to wipe down. The Tumble Forms Feeder seat can accommodate young people for any upright activity for short periods of time, at home or at school.

SPECIAL TOMATO SOFT-TOUCH SITTER

This soft touch seat provides a seating experience for a special needs child that is comfortable and functional. The Soft-Touch Sitters are made from a Latex-Free, Seamless material that is impermeable to fluids and guaranteed to be peel and tear resistant. Special Tomato Soft-Touch Sitters have a strong exterior that will stand up and last, while the inside is a soft, comfortable foam ensuring a comfortable sit. It has a soft contoured seat with anti-thrust seating surface, a built in abductor, contoured head and lateral supports and an adjustable 5 point positioning harness. The attachment straps are for securing to a standard chair.

FLOOR SITTERS

AKCES MED NOOK FLOOR SITTER

The nook floor sitter comes complete with most accessories required with just a couple of optional accessories. Available in three sizes and a range of colours.

JCM SUNBEAM

Sunbeam has a gentle rocking action which can be disengaged when not needed. This enables you to gently rock your child to sleep in any position, reducing unnecessary handling. The tilt in space and recline functions also aid the gradual development of head control. The lightweight plastic frame and removable, washable covers make Sunbeam the practical choice. Generous cushioning in the shaped seat and back provide excellent comfort, while the adjustable tray allows Sunbeam to be used as a functional seat as well as a feeding chair.

ACTIVITY CHAIRS

JCM TRITON SIZE 0

The Triton Zero is the same as its big brother below but is the smallest activity chair on the market, going down to 15cm seat depth but still offering excellent postural support.

JCM TRITON SIZE 1-3

Triton offers individuals who have extensive and complex seating and postural needs the opportunity to get active with others and their surroundings. Its unique combination of design, form and functionality helps children, young people, adults and their respective carers achieve greater levels of independence. Triton is therefore a socially inclusive seating system that meets the functional and clinical needs of the user and has been designed and developed with a broad spectrum of customers and their many different environments in mind.

JCM NEPTUNE

Neptune is a very user friendly, lightweight seating system. Available in 2 sizes it has a vast range of adjustment for growth, with a seat depth starting at 20cm all the way up to 45cm, and a seat width from 16.5cm to 42.5cm (at the hips) – Neptune caters for an age range 18 months to 10 years.

URSUS ACTIVE MULTI SEAT

The Ursus active is 4 products in one, the Ursus active chair can be mounted onto two different Hi Lo bases a wheelchair base and a buggy base. A real space saving piece of equipment.

COMFORT SEATING

CAREFLEX HUGGLE

The Huggle chair is a fantastic tilt – in-space paediatric chair for comfort seating. The chair is available in medium or high pressure relief in fabric or vinyl. There are two sizes available and a large amount of accessories to make the chair more prescriptive and supportive.

CAREFLEX HYDROFLEX SMALL

The Hydroflex is a tilt in space chair with back angle recline as standard, the Hydroflex is a great chair to bridge the gap between paediatric and adult seating. It offers fantastic seat depth adjustment, up to 500mm, various different backs which can be easily changed in the future.

CAREFLEX SMALL SMART SEAT

The small smart seat is width & depth adjustable, it also has a leg compensating leg rest and built-in (under the chair) footplate. The chair is Tilt-in-space as standard and has optional back angle recline, because the chair width and depth adjusts it really does grow with the child.

JCM JUPITER

The JCM Jupiter chair is a comfort chair with some clever features, the chair can be made with a split seat, laterals, shoulder protractors so is a good compromise between comfort seating and an activity chair.

CAREFLEX SMART SEAT PRO SMALL

The Smart Seat Pro is the most advanced chair of its type, it is width and depth adjustable so really does grow with the child. It also has a multi adjustable back so accommodates scoliosis, lordosis and kyphosis and the back rest is also height adjustable.

COMFORT SEATING

PROTAC SENSIT CHAIR

The Sensit Chair is a calming chair, aimed for ADHD, Autism, Dementia to name but a few conditions – the chair has 4 weighted sections that can be customised. The chair is a great multipurpose chair for numerous clients and the weighted support can be used in numerous different ways.

CHILLI BEAN POSTURE CUSHION

The chilli bean is a mouldable bean bag chair, Unlike regular bean bags the Chilli Bean posture cushion retains it's position set, but then adapts to new position when required. Chilli Bean could be used as a soft bean bag to relax or hard shell for the posture support. You can decide the shape and hardness of the cushion

MOULDBABLE SUPPORTS

STABILO GRANDE MATTRESS

The Stabilo Grande is a mouldable mattress that can be used in various different ways, it can be doubled over and used as floor sitter, can be inserted into a chair or the most popular use is to use the Grande as a sleep system. The great feature of this range is that it can be easily moulded and re-moulded.

BODYMAP POSTURE CUSHION

The BodyMap cushion is a mouldable cushion that can be added to a chair, wheelchair, buggy or even seat of a flight.

BODYMAP COMBI SEAT AND BACK CUSHION

The BodyMap combi cushion offers support in the base of the cushion and also offers support for the back with laterals and all parts of the cushion are mouldable to suit the client..

TOILETING & BATHROOM

BURNETT BATH SUPPORT

The Burnett Bath Support is a mouldable bathing support, it has a ramped seat to prevent the child slipping down the bath. The mould is simply created using an air hand or foot pump.

MANGAR SURFER BATHER

A powered elevating bath lift for children, which minimises moving & handling risks to therapists, parents and carers alike. The bathlift is operated by low air pressure using the battery powered Airflo power source.

SEAHORSE PLUS SANICHAIR

The new Seahorse is available in 3 sizes, a great Commode/Shower Chair, the manufacturers have redesigned the Seahorse this year and improved various functions & features of the chair. The seahorse now comes complete with a more comfortable liner, more support and more accessories available.

TOILETING & BATHROOM

NONO BATH CHAIR

The NONO bath chair is a basic bath chair for children who don't need a vast amount of support, but just minimal support required. The chair's back is adjustable, comes with one lap strap but more straps can be ordered. Available in 2 sizes, folds near enough flat so very good for travel purposes.

LITO BATH CHAIR

The Lito is a very clever bath chair that is available in four sizes. The great advance with the Lito is it goes a lot lower into the bath so the child can be closer to the water than standard bath chairs.

EGO BATH CHAIR

The EGO Bath Chair is designed for children with more complex needs. Equipped with a range of supports including trunk and lower limbs support, head support with pelottes and pelvic belt. The chair can be fully adjusted to your child's individual needs. Available in 3 sizes and fold easily taking up little space.

TOILETING & BATHROOM

CHILDREN'S SHOWER CHAIR

This height adjustable children's shower chair is equipped with a comfortable plastic seat with drainage holes and supportive back and arm rests. Also includes non-slip ferrule feet for extra support and for your peace of mind.

AUSTIN SHOWER CRADLES

The Austin Tilt in space Shower cradle range is designed to accommodate a wide range of clients, comes in three sizes and can be adapted to suit the users needs and requirements. The design of this chair enables easy access for cleaning and drying as well as comfort due to the materials ability to mould to the users body shape.

ROMA COMMUNE

The Roma commode includes an adjustable buckle strap for security and features a gap fronted toilet seat with hygienic removable pot with lid. Also equipped with a moulded comfort foam backrest.

TOILETING & BATHROOM

HMN M2 MINI ETIP

The M2 Mini El-Tip is a powered Tilt in Space paediatric shower chair which can be tailored to the individual requirements of the child and will grow with the child.

HMN MINI M2 SELF-PROPELLED SHOWER CHAIR

The M2 Mini Self-propelled is a highly configurable, self-propelling paediatric shower chair which can be tailored to the individual requirements of the child and will grow with the child.

HORCHER DOLPHIN SHOWER CHAIR

The Dolphin is a children's shower and toileting chair featuring both electrical tilt in space and height adjustment via a handset making it an ideal solution for parents or nurses to carry out care in a comfortable position.

CHANGING BENCHES & SHOWER TROLLEY'S

SEERS JUNIOR SHOWER TROLLEY

Designed to provide transport to and from the showering area, these mobile hydraulic Shower Trolley's feature a foam padded PVC liner for added patient comfort, a linked wheel system with central locking and steering facility.

HEMECRAFT CHANGING TABLE

The Homecraft paediatric changing table is one of the best selling kids changing tables on the market due to its excellent value, robust design and bright kid friendly colour. It comes fitted with 2 padded cot sides for safety and is highly mobile thanks to its large retractable braked castors which also gives the added benefit of being hoist accessible with a clearance of 160 mm. Available in a choice of hydraulically or electrically operated models.

CHANGING BENCHES & SHOWER TROLLEY'S

PLINTH 2000

The Plinth changing table is designed specifically for use within schools and homes for changing disabled people. The product features include optional cot sides, easy operation, low running costs, high density fire retardant foam, hardwearing anti-microbial vinyl and a unique lifetime guarantee.

WALL MOUNTED CHANGING BENCHES

The changing and shower benches from Pressalit Care have all been designed to provide a stable platform for changing children. There are both height-adjustable and fixed products with different levels of equipment for safety and comfort.

PAEDIATRIC AIDS

SCHOOL CHAIR FOOTREST

Height adjustable footrest, easy to fit and fits to any standard school chair.

ADJUSTABLE STEPS

Versatile steps ideal for children or adults when a little extra height is required. Ideal for the home, next to the bath, toilet, sink, bed or to reach a cupboard.

ROKZI ARMS & LEGS

A simple and effective stability system for children who need extra support in a standard school chair.

MOV-IN SIT

Helps growing children develop a correct and healthy posture, it's ideal for children who tend to slump in their chair due to poor awareness or low muscle tone in their trunk.

PAEDIATRIC ALTERNATING MATTRESS

The Paediatric alternating mattress is a specialist replacement mattress system specifically designed to fit paediatric profiling beds and to give optimum therapy for children and young adults.

FLOORBED

FloorBed by Accora is the ultimate low bed at only 15cm high including the mattress thereby eliminating the risk of falls from bed. An innovative and cost effective way of protecting children at a medium to high risk of falling. Equipped with height adjustable features allowing safe working height for the carer.

PAEDIATRIC BEDS

KALIN COT

Kalin profiling bed is equipped with a range of height adjustable features and includes safety side panels and comfortable pressure relieving mattress. The bed can be tailored to meet the individual requirements of the child whether for use in a hospital or at home.

IMPRESSION COT

This cot has been designed so that it is easily assembled and installed. It will serve your needs in what is a very demanding environment and create a safe space for children of all ages and sizes. It is available in two mattress platform sizes.

SAFESPACE COSYFIT

Cosyfit is a robust high-sided sleep area used mainly as a safe bed for those at risk of falling or hurting themselves on metal or wooden bed surrounds. Available with a hi-lo adjustable platform

SAFESPACE SIESTA

The Siesta creates a safe, low stimulation environment that promotes easier settling at bedtime and improves sleep patterns, providing a safer environment for those who continue to wake at night.

The Siesta's versatility and easy clean design make it particularly suitable for hospital settings or other situations where a wide range of clients' needs can be accommodated by one extremely tough and versatile piece of equipment. Available with a hi-lo adjustable platform

SAFESPACE

SAFESPACE

The Safespace is designed for those with autism, epilepsy, behaviours which challenge and profound multiple learning difficulties, including those with full mobility. It provides an extremely robust space to sleep, move, roll or play freely, reducing the risk of injury by eliminating hard surfaces.

SAFESPACE HI-LO

Safespace Hi-Lo was designed for those who require nursing care and the flexibility of a height adjustable platform, the Safespace Hi-Lo has a 41cms range of travel to provide a comfortable working height for most carers.

STABILO MULTISEAT

Ideal for use as a fully crash tested car seat, in buggies and wheelchairs as well as many custom applications. This seat can be adjusted to individual needs thanks to the stabilo system.

JCM CARROT

The JCM Carrot 3 special needs car seat has been designed, engineered and built to offer the very best position and safety for children with insufficient head and body stability.

SAFESPACE VOYAGER

A safe, transportable bed for holidays and trips away from home. The Voyager is a free-standing structure consisting of a robust, but lightweight, aluminium frame. It is suitable for respite care and for those who are uncomfortable in unfamiliar surroundings or are used to a safe room.

TOMCAT SUNFLY

Sunfly easily converts from a sleeping or feeding chair to a wheelchair to a bicycle trailer and even to a ski chair, in just seconds. The perfect product for those families who love to travel and are frequently on the go!

MOVING & HANDLING

INVACARE BIRDIE MOBILE HOIST

With maximum space for the user, both the Invacare Birdie and the Birdie Compact offer a truly comfortable lift and transfer to or from beds, chairs or even the floor. The lifters are designed to ensure that folding and unfolding can be carried out easily and without the need for tools. In addition, the lifter can be dismantled into two parts if needed - also without tools.

INVACARE ROBIN CEILING HOIST

The Invacare Robin ceiling hoist provides a unique and innovative method of transfer. The two strap design has no obstructive spreader bar; offering a safe and dignified transfer with optimal client and carer contact. The two strap design gives excellent stability and the smooth soft start function makes positioning more gentle and the two speed motor reduces the amount of time required for transfer. The absence of a spreader bar provides a sense of freedom and enhances the transfer experience. Maximum user weight is 200Kg.

HORCHER KIDS RAISA STANDING HOIST

Horcher Kids Raisa is a sit to stand hoist designed especially for children. Featuring a unique powered height adjustment of the knee blocks, the Raisa provides safe and fully upright standing transfers

HORCHER TONYA HOIST

Horcher Kids Tonya Patient Hoist provides safe and comfortable transfers thanks to its powered positioning cradle which provides caregivers the ability to pick up patients and comfortably move them to a sitting or lying position at the touch of a button.

MOVING & HANDLING

HORCHER LEXA PATIENT HOIST

The Lexa patient lift from Horcher is an excellent multi functional lift that can easily lift up patients from a sitting or lying position.

It can lift patients from the floor and move them easily and safely to a sitting or lying position.

It is a very comfortable belt lifter due to its swivel spreader bar. The sway free transport offers a feeling of security.

The Lexa is available with a variety of slings it can be used with both loop slings or 4-point clip connectors.

KLIP2LIFT HOISTABLE CLOTHING

The Klip2Lift hoistable clothing system is attractive, unobtrusive and designed to be worn all day.

The user is simply clipped onto any hook or loop fixing hoist and this is easier to do than by using a traditional sling system with a patient hoist.

The Klip2Lift Handling Jacket has been developed to provide support to those who require assistance when gait training, when standing or rehabilitation. It promotes safer handling and support for the carer as well as a dignified approach for the user.

PAEDIATRIC SLINGS

We have a large variety of paediatric slings available from 4 different manufacturers, which can be used with any type of hoist. From the basic to the most complicated and custom made slings.

DOBUGGY

The DoBuggy Stroller is designed for children with special needs. It is both comfortable and sturdy, keeping the pusher in complete control even if the child is moving around. It is easy to manoeuvre and perfectly stable even on bumpy or uneven surfaces.

MACLAREN MAJOR ELITE

The Maclaren Major Elite has been developed to meet the demand for an everyday buggy for children, who as a result of a disability have a need for portable, parent wheeled transport. Supplied in the basic format, the Major can also be customised with various accessories for added comfort.

BUGGIES

AKCES MED HIPPO+

Hippo+ Special needs buggy is the perfect stroller for daily care with supreme positioning features. It is equipped with swivel front wheels and reversible seat unit as standard so your child can face you or look outwards. Its foldable frame makes it ideal for those parents on the go. Available in 2 sizes and comes with many adjustable features to suit your child's individual needs.

AKCES MED ULISES EVO

Ulises Evo buggy is particularly useful for patients requiring additional stabilisation. It has adjustable seat depth and backrest tilt angle to meet needs of your child. With simple and light construction it can be easily folded, it is also smaller than most strollers - it can fit into the boot of a small car. Available in 3 sizes and includes an excellent range of safety features.

AKCES MED OMBRELO

The Ombrello Buggy is an excellent light and easy to fold buggy that includes the innovative BodyPrint seat with a unique belt system. Equipped with a range of adjustable features to suit your child's individual needs and to ensure correct position as well as 30° fixed tilt that promoted upper body positioning.

ACTIVATE4KIDS STREETWISE

Streetwise special needs buggy from Activate for Kids sets new standards of simplicity and protection. Compact folding for easy storage and transportation. Key features include Tilt in space, Reclining backrest, Postural support, growing seat, Crash tested.

ACTIVATE4KIDS TANDEM

The Tandem Buggy from Activate for Kids is the only special needs buggy with a sensible solution for carrying a second child. It folds making it ideal for transportation. Some of the key features include Rear suspension, Tilting Seat Unit. You can choose from a range of accessories including range of accessories: Head-rests, Trunk Supports, Harnessing.

BUGGIES

TENDERCARE SWIRL

The Swirl is one of the most versatile buggies around. Its rotating mechanism caters to both your own and your child's ever-changing needs. The Swirl can be easily rotated to either a forward (world-facing) or rearward (parent-facing). Some of the key features are: seat tilt, swivel and front locking castors, compact and easy to fold, soft touch pin lock brake, wide range of adjustments, crash tested and much more.

TENDERCARE SNAPPI

The Snappi is a highly adaptable, special needs pushchair designed to accommodate a wide variety of seating needs. It is lightweight and easy to fold making it ideal for storage and transportation. Key features include a wide range of adjustment, seat tilt, swivel castors, soft-touch pin lock brake, quick release seat unit, height & angle adjustable flip up footrest and much more.

TENDERCARE SNAZZI

The Snazzi is a modern, simple-to-use, special needs pushchair designed to accommodate a wide variety of seating needs. With its quick, all-in-one folding frame, the Snazzi is the ideal travel companion for all of life's adventures. Features include a wide range of adjustments, easy to use footbrake, swivel front castors, back recline to 95 degrees.

MERCADO REAL TABLE

The Mercado Table is designed for use in any type of situation. The multitude of options and continuous adjustment over a wide range ensure that the correct posture can be obtained. The stomach recess will ensure that the child is far more stable, leaving them more energy for reading, counting and crafts. This stable, robust desk will last for years. It is ideally suited for combination with the Mercado Real paediatric chair. Both the desk and the chairs are designed in such a way that they form a single unit with existing school furniture.

AKCES MED JOY TABLE

The JOY Table is an excellent height adjustable table that can be used with any positioning chair, or school and office chairs. It has a wide table top making it suitable for playing, learning, eating or using a computer. The Joy Table is very stable due to its firm construction.

JONCARE VARIHEIGHT TABLE

The Varied height table from Joncare is designed to be height adjustable and are great for use either singly or in a group. The frame has a heavy duty steel construction with epoxy coating. The height adjustable features of this table make it ideal for all age groups. Smooth action that allow height adjustability in one movement.

PAEDIATRIC TABLES

ABLE TABLE

The Able Table's universal design allows a carer, teacher, or parent to easily offer hand over-hand assistance, whilst in an everyday, inclusive and comfortable setting. Designed to offer wheelchair users and their carers / peers a comfortable sociable setting

ACTIVATE4KIDS SOLO TABLE

is a Height and Angle Adjustable Table that has a work surface 900mm (36") wide by 700mm (28") deep, making this a table for one person.

The height variation is from 710mm (28") in its lowest setting to 1070mm (42") when fully raise

SALLI SCHOOL TABLE

The Salli School Desk can be used in both a sitting and standing position. Height adjustable from 71-110 cm. It is easy to move around with front castors. It is stable and offers an affordable solution.

THERA 540

The THERA-Trainer mobi 540 is a compact and convenient arm and leg exerciser. It has been specifically designed to help those who have slight physical limitations and was developed for daily use in the home. It is very light weighing just 13.5 kgs making it ideal for transportation and storage.

THERA TIGO 510

The Tigo range of THERA trainers can be tailored to suit individual disability needs and ranges, and provides workout for a variety of people including wheelchair users. The Thera 510 model includes control and display unit with 10.4 colour screen including touch-functions as well as many adjustable features and supports.
