

ATTO

Mobility never looked so good

See the world – and be seen – with ATTO, the smartest high-performance mobility scooter on the market. While the compact folded unit splits in two for easier transport, ATTO comes together to form a robust full-sized vehicle with the best balance and use of space.

ATTO's beauty is in the details, with standard features like a built-in USB charging port, deck storage and adjustable seat heights. It can also be customized with accessories like hidden arm rests and batteries with various capacities. A head-turning piece of equipment for those who literally would not ride in anything else, ATTO is the mobility scooter that refuses to look like one.
